

Hands-on Intro to R

Wim R. M. Cardoen & Brett Milash
Center for High-Performance Computing (CHPC)
University of Utah

September 29, 2022

Overview

This document contains general information for the "Hands-on Introduction to R" lectures.

I Access to the R language interpreter and the RStudio IDE

The lectures require the access to an R language interpreter and the RStudio IDE. Below, you will find a few options:

1. If you have a valid CHPC account you can use CHPC's [Ondemand Web Portal](#).
After logging into OnDemand you can launch the RStudioServer application which contains R and RStudio.
2. You can apply for an account on RStudioCloud (which provides 25 hours of free computing time per month).
RStudioCloud contains R and RStudio.
3. You can also install R and RStudio on your machine.
The R command line interpreter can be downloaded from:
 - either [Microsoft R Open](#) (binaries for MS, Linux and Mac-OS).
 - or the [Comprehensive R Archive Network \(CRAN\)](#).

The RStudio Desktop IDE can be downloaded [here](#).

II Obtaining the material

All the course material can be obtained from: <https://github.com/wcardoen/IntroToR>.

If you have `git` installed, you can obtain the material as follows:

```
git clone https://github.com/wcardoen/IntroToR.git
```

Another option is to download the following zip file:

<https://github.com/wcardoen/IntroToR/archive/refs/heads/main.zip>
